Purpose Built

Products for your unique application from
a company invested in your success.

LOW FRICTION COATING

Low friction coatings solve installation or performance challenges, such as abrasion resistance in a cyclical application or reducing friction during assembly.

Co-extruded materials create a profile with excellent compression set and a kerf base that is easily inserted into a channel.

Vulcanized or transfer-molded corners improve joint strength, meet aesthetic requirements and ensure material compatibility.

This co-polymer design features an EPDM bulb and rigid plastic base that offers excellent compression set, easily slides into a channel and minimizes stretch.

DUAL & TRI DUROMETER

iDea® SEAL

BUILT TO SERVE

Cooper Standard ISG designs seals and gaskets for commercial and residential windows and doors, storefronts, curtain wall systems and other building applications. Our engineers work with you to develop solutions that perform in demanding environments while satisfying architectural design specifications.
