Keystone Series Single Wheel Roller

In response to high inflation market trends, the need for affordable housing, and a desire for maintenance-free living, AmesburyTruth has optimized performance and price to bring a value roller solution to the vinyl patio door segment. The Keystone Series single wheel roller featuring high-quality ball bearings carries up to 200 lbs. of panel weight and exceeds AAMA 906 requirements. Steel housing offers corrosion protection, and the end-adjustment provides easy fabrication into vinyl patio doors. Available in three installation applications, the design allows for an easy, drop-in, replacement solution. Assembled in North America so customers benefit from shortened lead times without tariffs.

Some things are better on the inside.

Blink puts the blinds between the glass where they clearly make better sense. (Not to mention being a lot less awkward.) Our unique design eliminates strings, wands and dusting to offer easier control, uncluttered looks, and years of enjoyment. All of which should really help get customers' attention. And, benefit your bottom line.

CELEBRATING

FENESTRATION

In 1997 STÜRTZ MACHINERY INC. was founded in Solon, Ohio. Since then we've come a long way. Over the past quarter century, we've developed the first FLEXFAB, developed turnkey systems and introduced "Motion" and "Jet" control applications. We won the Crystal Achievement Award multiple times for innovative machinery in sawing and welding. We introduced the Linear Pro family featuring automated sawing and fabrication for the North American PVC window and door market. The move to our current location in Twinsburg, Ohio in 2022 has enabled us to not only double our size, but most importantly, it has allowed us to continue supporting the growth in the North American window market by increasing our staff in engineering, project management, manufacturing, and service.

Through the years we have developed a passion for innovation by having a vision and following through on it, even if it means pushing the boundaries. Our eyes are on the future of automation in North America as we provide solutions that best fit your manufacturing needs. Let us help you to realize your vision for a more automated production process.
